

# **Math, Minds, and Meteorology:** **Analyzing the International Math Olympiad**

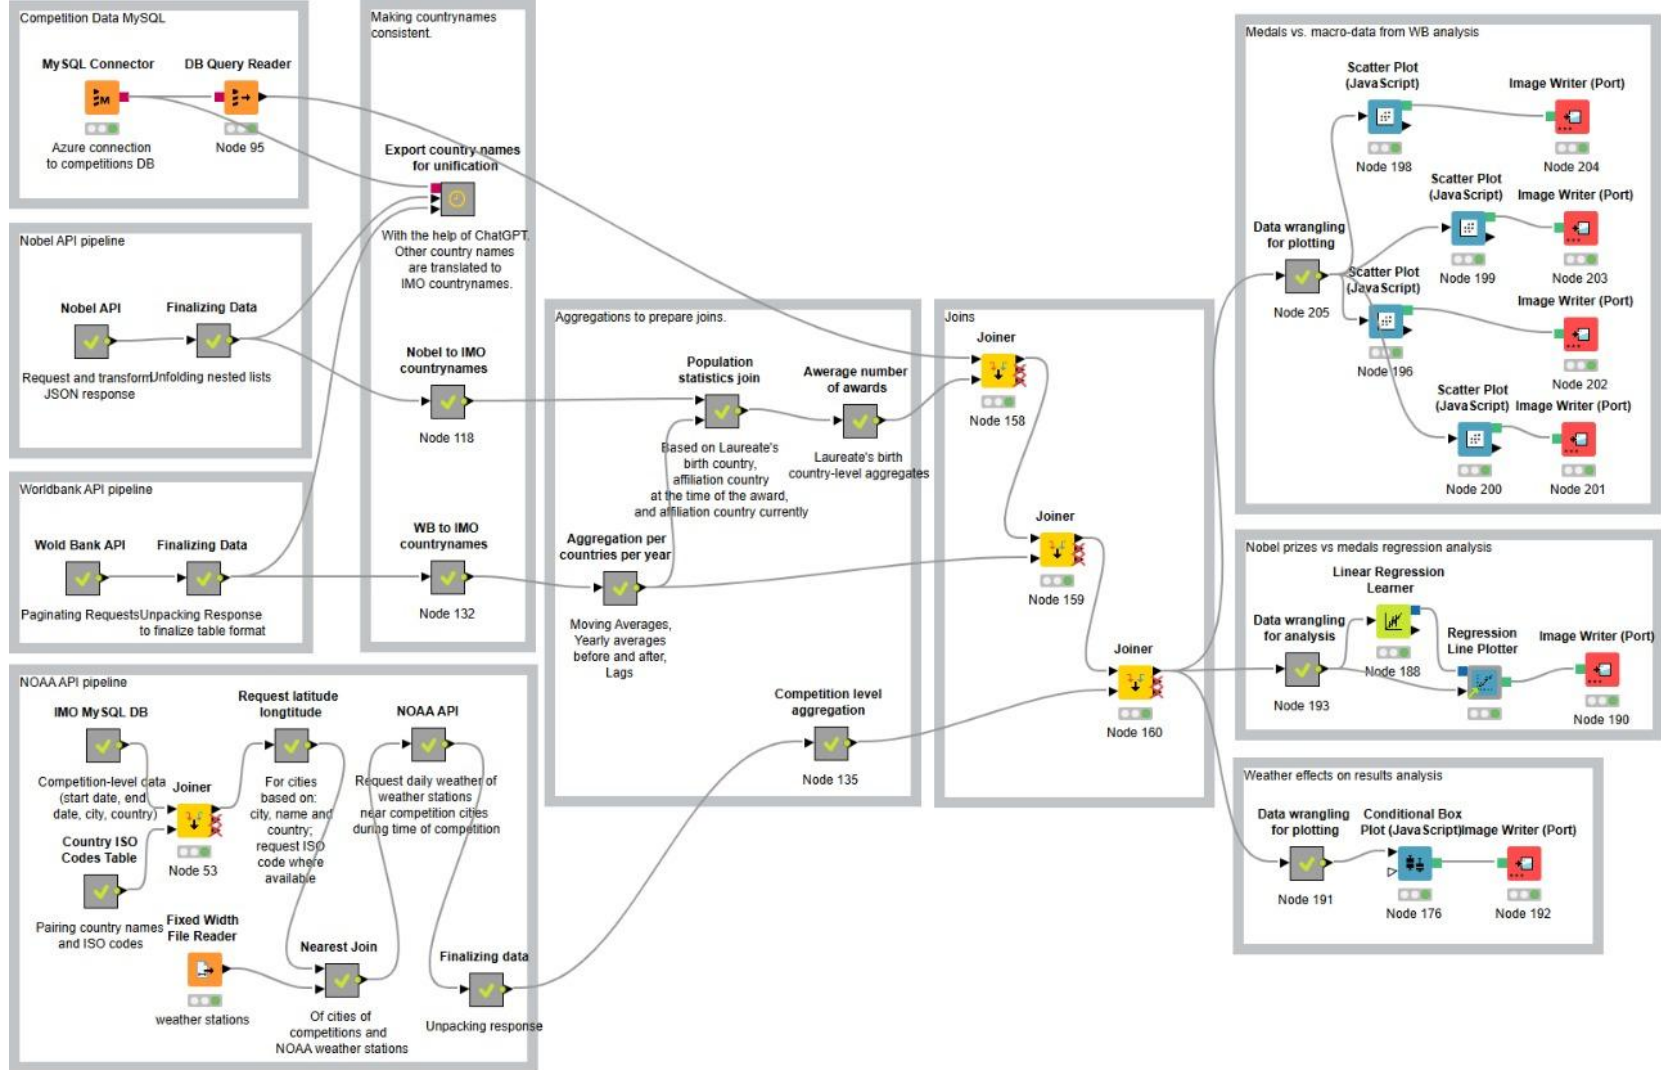

# DATA

# JOINS

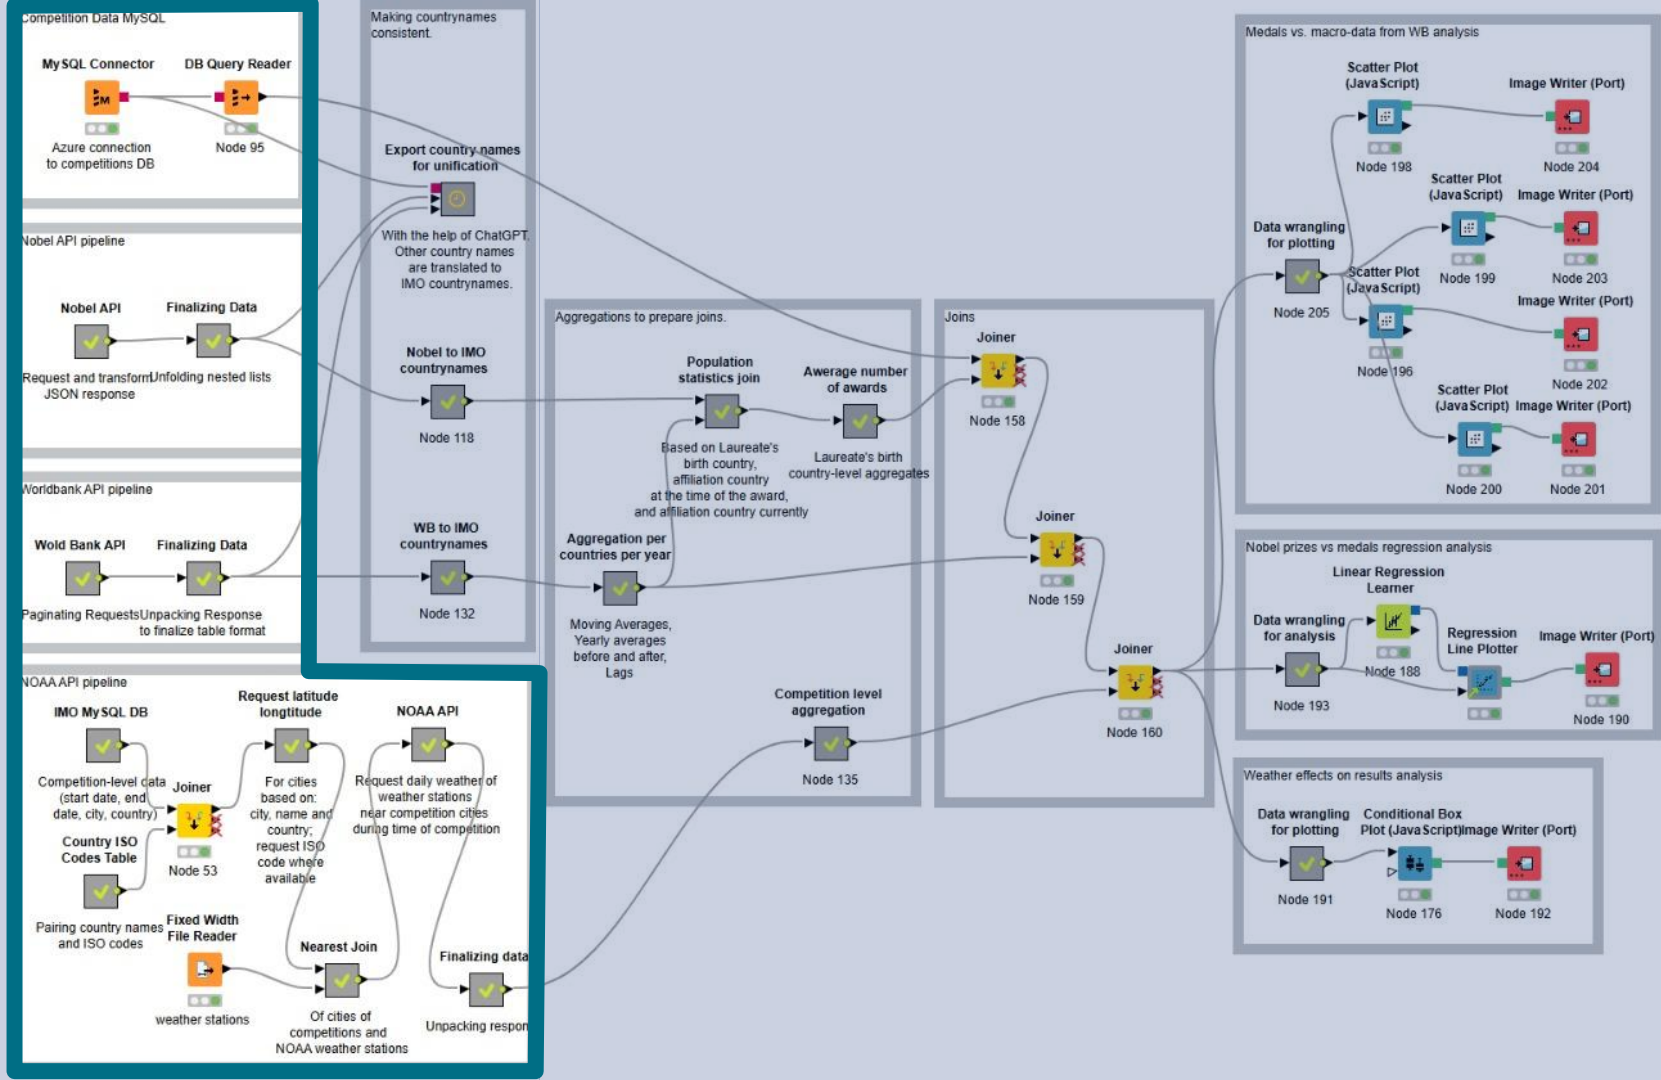

# ANALYSIS

A large, bold, green number '1' is positioned in the upper left quadrant of the image. The background is a dark teal color with a subtle, light green circuit board pattern. A diagonal line runs from the top left towards the bottom right, separating the circuit pattern from the solid teal background.

# DATA

Data sources & workflow

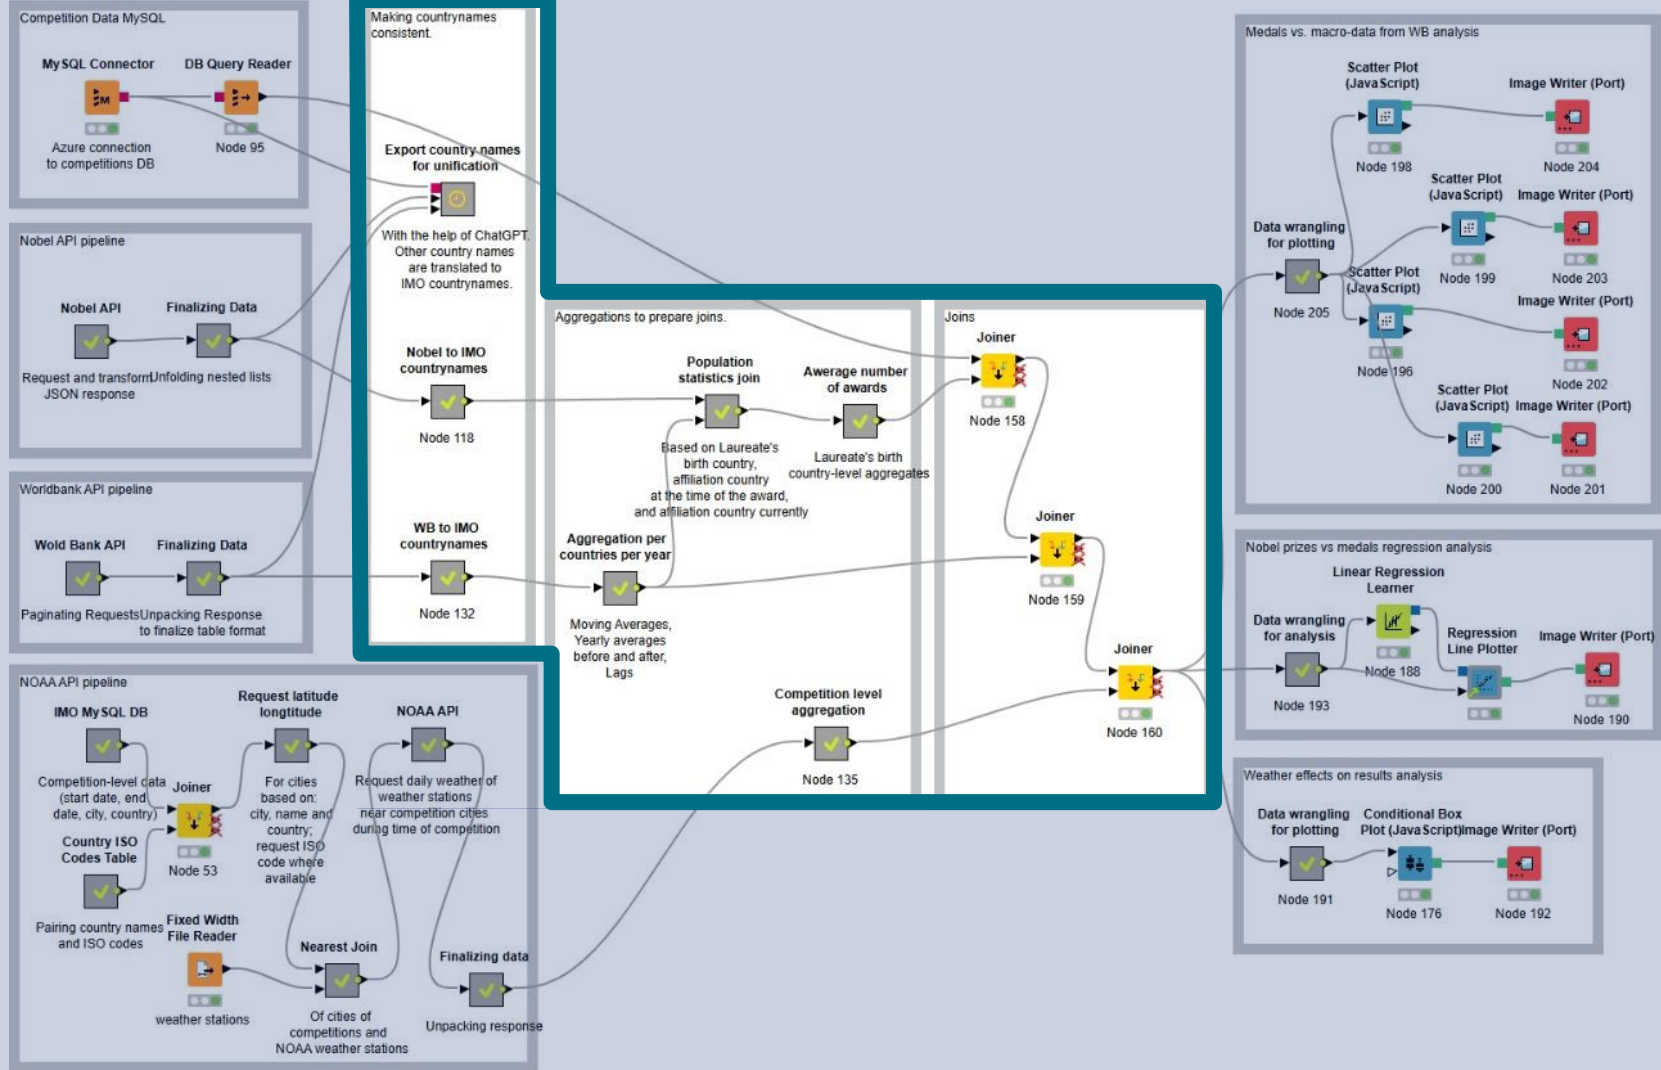

# DATA SOURCES

Data	Level of observation	Workflow
International Math Olympiad (IMO)	Competition, participant	Downloaded from GitHub, pushed to Azure
Nobel Prize winners	Year, individual	Nobel Prize API, Knime workflow
World Bank Education Statistics	Year, country	World Bank API, Knime workflow to paginate and impute missing values
National Oceanic and Atmospheric Administration Weather data	Competition city	NOAA API, Knime extension to match the city to the closest weather station

World  
Bank data

A large, bold, green number '3' is positioned in the upper left corner. The background is a teal gradient with a faint circuit board pattern in the top-left and bottom-right corners.

# 3

## ANALYSIS

Data analytics & visualization

Does the climate of the venue matter for IMO results?

# CLIMATE

No relationship  
between the climate of  
the competition location  
and participants' home  
country

# NOBEL PRIZE

No strong relationship  
between IMO medals  
and Nobel prizes

Linear regression of  $\ln(\text{avg. Nobels})$  on  $\ln(\text{avg. medals})$  ( $R^2:0.1114$ )

Weighted medals vs. 10Y MA GDP pc. PPP

Country-year obs., log-transformed values, missing omitted.

Weighted medals vs. % 10Y MA publ. educ. exp.

Country-year obs., log-transformed values, missing omitted.

Weighted medals vs. % 10Y MA secondary school

Country-year obs., log-transformed values, missing omitted.

Weighted medals vs. % 10Y MA numeracy level 4-5

Country-year obs., log-transformed values, missing omitted.

# EDUCATION STATISTICS

Mixed results on various education indicators
